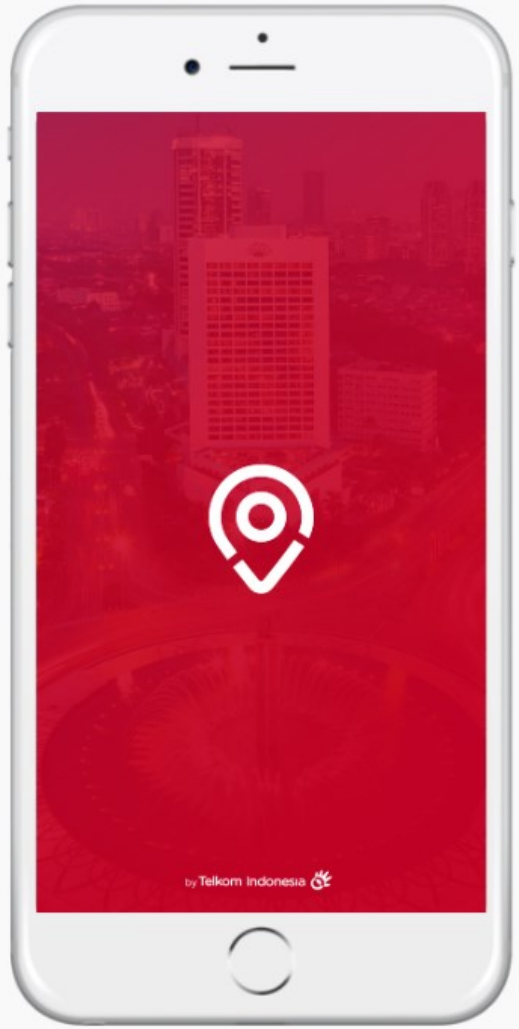
ODP Management Application

ODP Management Application helps Telkom staff to expand and improve wifi.id services to client.From this application Telkom staff can schedule and manage canvasser task.

ODP Management Application was created to help Telkom staff to improve wifi.id sales higher, and manage the ODP database better.

GET IT ON Google Play



Wifi.id Sales APPS

Telkom Indonesia

Wifi.id Sales Apps Website and Mobile Appication

When Telkom Indonesia asked us to solve their obstacles with their Wifi.id salesforce, we've come with a great idea using mobile application integrated with Google Maps and phone GPS.

Now with our mobile apps they can determine where is the lowest occupancy ODP spot to set for a new Wifi.id customer.

Our apps get the salesforce geolocation and show the nearest ODP point, It can also be used as absent device to get KPI (Key Performance Index)

Telkom Indonesia

Telkom myWifi

Mobile Apps Development

We Design and Develop myWifi apps for PT. Telkom Indonesia. From this apps, user can buy wifi.id package and search the nearest wifi.id spot or buy interesting deals from myWifi apps.

JETORBIT

Telkom Indonesia

Telkom Wifi.ID

Arsipedia

Arsipedia Digital Archive Website and Mobile Application

Indonesia's Transmigration Ministry trusted Corocot to develop and change their way to organize data from manual to digital.

We've come with a solution by migrating all their archive to a cloud system database. It is easier to find and much more secure.

Only authorized personel can access and find the database, using OTP (one time pin) sent by our backend system to client's mobile phone number.

With our new system, Indonesia's Transmigration Ministry moved from number 18 in the ministry contest to the 3rd position.

Suma Adi Jaya

Web Based Finance and Stock Management System

Suma Adi Jaya specialized in Industrial Fuel supplier more than 15 years, we develop a web based finance and their stock management system to create Purchase Order and it can be validated through the owner mobile phone via email client apps.

TKI System - Assalam Group

Assalam Group is agency of labor of Indonesia that recruite and supply the worker into region such as Singapore, Hongkong, Taiwan, and Thailand.

With many labor come from different area in Indonesia, and each of them are candidate for each region and also managing fee become difficult when Assalam Group still using old mechanism, manual writing on text book and excel.

We create a centralized website apps that can help their agent to track, manipulate, followup the candidate of worker, and fee management. Now Assalam Group can easily manage their labor of Indonesia.
